## 1. BELOW

You must sense a message of a flame  
Blackened powder made in just a day  
Victors marching down into the vein  
Footsteps of the mind were never here  
For reasons  
My heroin

You must sense a heat of metal  
Needle hot it pierces dural  
Can a peace of light appearing  
Undertakers flash of metal  
Seize the moment seize the hot one  
Brown and black a dive of deepest  
Silver spoon and shiny metal  
Tube of power, tube of spiral

## 2. CLEAR ENOUGH

Face the music in the day I think I'll follow in the way  
If only you could see what I do you would never face the day  
Take a follow and be there and never looking back to stare away  
Make yourself another pie and cut it into quarters any way

Leprechauns are facing me inside a distant residue of lies  
Rising from a smoky ring the parasites are eating all my lies  
Craft a level interest there from dueling leverages we see on high  
Find another way to see the symmetry of distant fiery skies

Priests and river told  
Have another rest of gold  
Priests and river told  
Have another rest of toll  
Priests and river told  
Have another river gold  
Priests and river told  
Have another river gold

### 3. CREVICES

Take a spot and leave it well  
And wall it all in moon  
Look to skies, see them rise  
And wall it all too soon

See it ride upon the hill  
And read upon his mane  
Holding out to woe is me  
A sea that all the same

Take your spice, relax your eyes  
Lonely in you feel  
Mystery grown and see your eyes  
It takes away your feel  
Roll along and see your life  
It takes another pain

See it ride upon the hill  
And read upon his mane  
Holding out to woe is me  
A sea that all the same

#### 4. FAR

A feast of wallow in the way  
A yellow burden in my head  
I haven't got the strength to stay  
I cannot even be a man  
Simple pleasures simple times  
To tear the muscles all away

A new surprise comes along the path  
To greet those grown weary with hope for again  
A silence hides the pride of age  
Looking on youth with great surprise  
Trepidation abounds for both  
Looking to change their orientation  
Like two magnets searching for a clasp of fields

A crop of new lives happens now  
And now I see the light of day  
An old man stumbles on the path  
As children pass they lead the way  
A common stare with common ground  
Beside them all the flowers play

## 5. PEAK

No more free  
I'm on the ground  
Total fall  
I make no sound  
I'm on my knees  
On my face  
I see no give  
Into this place

Wretched man  
That I am  
No more love  
That I can  
No more receive  
No more to give  
All rise denial  
I cannot live

## 6. PLUMMET

Black is not an ice  
Black is just a sea  
Caught inside a bitter mind  
Devastating cup of tea  
Go inside a bitter lisp  
Frozen like a blister be  
Wandering foreign in a world  
Lost among a bitter sea

Black is just an open sore  
Black is just a day gone wrong  
Black is just a heart turned cruel  
Black is just imagined rules  
Black is just a face without  
Black is never in a doubt  
Black is what I feel today  
Black is never here to stay

## 7. RED FOR ICE

Reach around the wisdom of the teachers  
Separate yourself from every kind  
Come along the wisdom of the ages  
Cannot see the concrete of the sun  
Living in a vacuum of a season  
Living as a castrated nun

Sinister is nothing but a dreamer  
Rushing through me like a cannonball  
Into saving life like it was leaving  
Capable of killing every being  
Living as a shell in torrid water  
Living as a deadened joie de vivre

## 8. RISE DEEP

Have another time  
Have another space  
Syncopated rhythm in a generated race  
Do another nick  
Do another line  
Do another syncopated generated time

Have another bowl  
Sink another fall  
Feed another fate  
Crush another pain

Cry another tear  
Block another way  
Minimal existence is the order of the day  
Do it all the time  
Have it all the hour  
Chemistry of brain is such a tendency to fail

Have another bowl  
Sink another fall  
Feed another fate  
Crush another pain

## 9. SHEAR

You get a sense  
Of dictionary minds  
Grammar and syntax have never really been a call of mine  
When I'm high  
I really do not care  
It's not as surprising as when I lose it all in there  
A beggar's plea  
Is always on the rise  
It seems like lately the begging part is all but a surprise

## 10. SLIPPING

Force in like the sound of rolling thunder  
Born into a genuflecting sky  
Clouds cover immediate asunder  
I bleed in a generous crimson dye  
Cry out with a suicidal rebel  
Sting back with a grin of apropos  
Masons building ladders by the poolside  
Great mass of antagonistic fools

Ride down with a media of plasma  
Sink low with the heat of hundred days  
Sling back in a year of vicious hatred  
Find love in a thousand different ways  
Please God will you find a different answer  
Cold cock on the crest of hammer's note  
Be quick in a sense of bold direction  
Be quick if you want to give it up
