

# BIG RED NIGHT

## 1. BREAKING THE MELD

Falling

I wandered into shadows of the table

Just time

You met her in another kind of living

So deep

Your satisfaction is a nothing rainbow

For me

In reservations for another table

Falling

Another dire hour finds me crashing

Just see

The light that shines down from another memory

For sin

You find another wretched man is standing

Cold fears

Another indigestion is a memory

## 2. CORNERSHOP STRIP

Shadows creep  
All along the river's angry ridge  
Beast of prey  
Falls into the deeper well of emptiness  
My own day  
Lengthens into meanings of a darkened way  
Please release  
From the shackles of the prison's carrion

Tempest rise  
Blacker clouds are rising from the hooded land  
Driving rain  
Down inside the corridors of empty walls  
Sinister  
Faces in the corners of a weather hall  
Laughing voice  
Inching from the lips of any passing face

### 3. DID YOU CALL

All in time you'll see  
All is all the way up  
All in time you'll be  
All in time you'll wake up  
Finish what you are  
Simple if the way go  
All in time you'll feel  
Nothing from the daybreak

All is what you'll be  
Find another finish  
Hollow like a freeze  
In a desperate sail  
All is making moves  
Simple as a problem  
Catch another day  
Institute or fail

Shame is just a lonely way  
Shadows are not a final thing  
Rolling enough on a lonely time  
Isolation of concrete beds

Simple suffering  
Does not make the wind go  
Every minute mends  
'Til the clock has stopped now  
All is but a lark  
Into reach of lovers  
All is just a ruse  
Justice has no patience

Shame is just a lonely way  
Shadows are not a final thing  
Rolling enough on a lonely time  
Isolation of concrete beds

#### 4. GESTATE THE BREAD

Reach out

Falling

Freezing

Hurting

You are the light of weight on soul

You are the problem on again

You are the one who's leaving me

You find the ever cheaper life

You go along with bastard aim

You are the failing of the sea

Go down the hole like rabbit brer

I see the world that you can't do

I always know that you are leaving

Reach out

Falling

Freezing

Hurting

## 5. IN TIME CAREENING

We're coming to a waste  
A calling of the nations  
Falling to his grace  
And see another patience  
Nothing else will do  
Coming off the graders  
Pacify is you  
We'll see it every station

Cradle rocks another world is able to be inside  
Cradle rocks another world another world is deepening  
Save yourself another day is ever black and creeping  
Can you see another night is growing long and deepening

We've come so far in taste  
A sinister complexion  
A hollow dream today  
A simple insurrection  
A climate isn't right  
To fortune of a massive  
A meteor in flight  
Extends the distant have beens

Cradle rocks another world is able to be inside  
Cradle rocks another world another world is deepening  
Save yourself another day is ever black and creeping  
Can you see another night is growing long and deepening

## 6. KAROB

You don't want to see it in the commissary wings  
You don't want to have it any time  
Find another wisdom in a pair of shiny things  
Can you find it thinner in the mind  
Appaloosa horses didn't figure in your plan  
Feathers falling off a sticky line  
You don't even sing it when the words are whipping free  
Sadness isn't just a state of mind

Don't want nostalgia  
Begin you to loosen  
The grip of indulgence  
Depression into it is fine

Blow away the summer scent  
Cold is down from heights above  
Is there only just one way  
Finding sadness in your love

Sinister examined every move that I may make  
Trusting every vision that you see  
Fallacies of irony in step with every look  
Danger isn't left with you and me  
Plagiarism enters every conversation had  
Knocking on the doors of chivalry  
Grab a sense of nuisance from the shelf of memory  
Slap it in the face of those who see

Don't want nostalgia  
Begin you to loosen  
The grip of indulgence  
Depression into it is fine

Blow away the summer scent  
Cold is down from heights above  
Is there only just one way  
Finding sadness in your love

## 7. LASTING

You will take it down the strange  
I will listen on another wave  
You will see it on the rise  
All above the tiny ripple waves  
All the world is calling me  
You will see it covered in the sky  
Seventeen is not the same  
Everyone is not the same as I

Feel it in the rain, carry in the wind  
Feel it in the window, feel it in the window  
Piling up you see, as I get down on my knees  
You can feel it in the window, feel it in the window  
Falling down the hall, it never takes it all  
And you see it in the window, see it in the window  
Coming down to me, all the reasons to believe  
You hear it in the window, hear it from the window

Hear it in the conversation noise

Fascination with a page  
Taken from a book of incidents  
Cannot leave it in the rain  
Waterlogged it like a criminal  
Satisfaction hasn't been  
Doesn't seem to be that practical  
Smell the silence of the wind  
Rising from the nimbus tropical

Feel it in the rain, carry in the wind  
Feel it in the window, feel it in the window  
Piling up you see, as I get down on my knees  
You can feel it in the window, feel it in the window  
Falling down the hall, it never takes it all  
And you see it in the window, see it in the window  
Coming down to me, all the reasons to believe  
You hear it in the window, hear it from the window

Hear it in the conversation noise

## 8. MAGIC GLASS

Seek a licking  
To save long time  
Shimmering now  
Falsify it  
In a vacuum  
Shimmering now

I don't want to list this now  
I don't want to live in pain  
You don't know what mind is here  
You don't know what mind is hate

Find a reason  
For your actions  
On a crisis  
Crazy temptor  
Stick a knife in  
Turn it sideways

You don't want to face the world  
You don't think of times ahead  
I don't want to be that one  
I don't want to fall into

## 9. MANGROVES

For lean on the road  
For lean on the river send you  
For lean on the road  
For lean on the river send you

Going away gonna have a have a safe night  
Sitting here alone and getting in a fist fight  
Charging up the ramp in an idiotic blood call  
Shaking in a charge of a paraplegic mantle  
Counting up the days to a nothing missing action  
Added up the numbers and a missing stranger homeland

For lean on the road  
For lean on the river send you  
For lean on the road  
For lean on the river send you

Find another way just to have a simple blessing  
Down there to pray just to satisfy a wish list  
In every God is a superstitious minstrel  
Got me a God with a telepathic whistle  
Waiting for the end of the jalapeno blister  
Falling for the light in a shiny amber minute

## 10. SLIPPERY TIME

With daring eyes in the manger  
With feeling hands come untrue  
With firelight comes the danger  
We're falling now into blue  
My fatal ring isn't calling  
My walls are now on the crest  
For memories are all fallen  
Anticipate for the test

A rising of simple swelling  
According to tales unseen  
A bestial eye is unsettling  
To fortunate haven't been  
Collapsing now seems to feel  
The grain is gone far away  
A sense of time to congeal  
The darkness comes here to stay

## 11. TERRIFIC

Falling down the season's way  
Calling out another day  
Falling down the mess revealed  
Coming round to set the tales  
All in chains of mystery  
Give it up for being free  
There is hope in life you see  
Coming down, in like a bold disease

The weight of happy take  
The thigh of mystery tapes  
Real summer's end  
Can't explain the end  
The walls of liberty  
The same shallow men  
A wretch in river sings  
The day of rivalry

## 12. VIEW OF THE SPIRIT

Go and roll around a very lonely lonely soul  
Sleeping on a simple side of dying yellow days  
Growing with the hammerhead of sacrificial bread  
You say you return the early bitter morning haze  
Rolling with a whimper and you call it in the night  
A cantilever raises bellows in the heaven mode of heaven dying

The white house  
With symmetry  
The white house  
With mystery

Rolling times I feel a certain peace  
Of nothing in the way of have another day  
Killing time upon another space  
You feel it in the wind you feel it in your face  
Different ways to come upon a man  
Who's going in his face who's suffered all the lamb  
Get along and find your way my friend  
You'll see a different path you'll see a different end

The white house  
With symmetry  
The white house  
With mystery  
The white house  
With history
