

## EMERGE

### 1. CARRY

Singular in my low ambitions  
Singular in mind along the way  
Fasting times I call alone condition  
Singular in mind along the way

Oh say a lonely demon  
Oh say for tone LA  
Oh say can be a hiding  
Oh say a brand new day

Singular in my Apollo vision  
Singular in my Apollo day  
Feel the earth in rising all the fissures  
Feel the earth emerge in whole new ways

Oh say a lonely demon  
Oh say for tone LA  
Oh say can be a hiding  
Oh say a brand new day

## 2. CRASH

Can you see this frozen place  
All in all went to the river  
Mind is set in a whole world of face  
Mind is set in a dull older river  
Mind is set, this mind has changed  
Calling down to the roll in the river  
Falling free and falling vain  
Kind of sense, a mind of rivers

Can you see this frozen place  
All in all went to the river  
Mind is set in a whole world of face  
Mind is set in a dull older river  
Mind is set, this mind has changed  
Calling down to the roll in the river  
Falling free and falling vain  
Kind of sense, a mind of rivers

### 3. EMERGE

In a rise from the sea  
Into air follow me  
Reach afar, walk alone  
Touch the star, fall alone  
Indeed you see  
The light touches me  
Indeed you see  
The light touches me

Little always time for always  
Little owls will be for always  
Little life is all we love to see  
Little love is all we love to be  
Little life is nomad in his time  
Little sound surround and be the love  
Little this is love and all will be  
Little time to come when all will see

In a rise from the sea  
Into air follow me  
Reach afar, walk alone  
Touch the star, fall alone  
Indeed you see  
The light touches me  
Indeed you see  
The light touches me

#### 4. FALSE

You have lived like I know you felt like you slipped  
Like I know you have disappeared into your body  
You spin your hips  
You twist your body

Minimal, you feel your body  
Minimal, you crave a soul

You find a fish that is real  
You seem a mind after pain  
You reek of perfume and bliss  
You feel a time of release

Minimal, you grab a soul  
Minimal, you feel your body  
Minimal, you found a tomb  
Minimal, you take a ride

You find a fish that is real  
You seem a mind after pain  
You reek of perfume and bliss  
You feel a time of release

## 5. FINNISH

To will a mindset  
You can't escape without a combat  
You reach a simple evocation  
A subtle minor invocation  
You see that you will be a misery  
Intensify a common tendency  
If everyone was like you baby  
You never come to see them maybe

Wretched boys of olden days have come along the way  
Oh what are we

Wretched boys of olden days have come along the way  
Oh what are we

You reach the world of me today  
The bedtime splendor is to play  
Come forth and lover gone away  
To now reborn and rise this way

## 6. GULP

Wind, all around me wind  
Saving the good ones for traveling far in the wind  
I'm waving in the wind  
Waving in the wind  
Fire, I am only the fire  
So bright burning all to an ash  
I'm only the fire  
Forming the light of the planet mass  
Forming the life of the planet mass  
Water flowing in the air  
Feeding the molecules, breathing the life in there  
I've settled on the earth  
I've settled on the earth

Breeze, I am simply the trees  
Grown from an acorn, pushed from the soil trees  
House the lemurs, house all the men to be  
Trees

## 7. KANADA

Feels like a lion Mayan day  
Figure that you simply bite the head  
Featured something featured some sublime  
And acrimony is not really mine

Wait all the time  
Say it's not mine

Shake it now  
Shake it pain  
Power of north  
Power train  
Take a ride  
Out of the foam  
Shake it now  
Power of none

Crush a can with scissors on a hand  
Manage birthing from a different play  
Authors spend a silence with their hand  
Authors spend a rally in their way

Wait all the time  
Say it's not mine

Shake it now  
Shake it pain  
Power of north  
Power train  
Take a ride  
Out of the foam  
Shake it now  
Power of none

## 8. OPERATION

Come along  
And see what you want to be amazed at  
Rivers, trees and sky  
Simple purple visions of the eye  
Canon's rage  
Canon's rage against the tide below my face  
Mercury flow  
Flowing into pools of laughter

When a glossy time feels like a stranger  
The moss is hanging low  
Mercurial distance measured  
In seconds of seconds way too low  
Bastions hounding, waiting, tempting you to break  
Out of your shell  
Embryo no longer glass eyed  
Particles rebound so so so low

## 9. RISK

Like a reach in heaven's time  
There's nothing more to teach than poetry  
Genuflect, it's nothing like a curse  
It separates from life among the trees

Your body rise  
To walk two legs  
The eyes face front  
And think of death  
Your body rise  
To walk two legs  
The eyes face front  
And think of death

When the neurons turn to tracers  
Behind your closed eyes  
Packed tight from inserted fists  
Struggling to manufacture light  
True to the brain's translation  
It means you need to be born  
Gushing forth with life  
And greeted by souls  
Before the pillars of God almighty

Wake yourself, emerge from time  
There's something you can do  
To satisfy  
Open eyes, it's nothing like it seemed  
From the blinders of the lies  
Before the light

Your body rise  
To walk two legs  
The eyes face front  
And think of death  
Your body rise  
To walk two legs  
The eyes face front  
And think of death

## 10. RUSH

Reach upon a star scintillate  
Find yourself another respite way  
In a dark Valhalla there's a way  
Find another recipe for pain

For the simple life  
So the greaser's hair  
For the rusty knife  
For a single elevation towards the sun  
All is safe  
All is saved  
All is sane

Polarize in politics  
Sturgeon eggs for comic eyes

## 11. STRIPES

Mind is over matter  
Mind is over rain  
Mind is over reason  
Mind is over pain

Mind is over matter  
Feel life is wrong  
Mind is over rain  
Feel life is over  
Mind is over reason  
Feel life is strong  
Mind is over pain  
Feel life to matter

Decadent spray  
And scurrilous emotion  
Drive careening downhill quickly  
Cattywampus both too and fro  
Becoming nothing short of a great demon run

Driven by pain so insidious  
As to juxtapose between light and dark  
Inside a cracked egg womb  
First festering then fostering  
Nothing short of miracles  
Enticing glory and grace  
From a darkened embryo

Mind is over matter  
Mind is over rain  
Mind is over reason  
Mind is over pain

Mind is over matter  
Feel life is wrong  
Mind is over rain  
Feel life is over  
Mind is over reason  
Feel life is strong  
Mind is over pain  
Feel life to matter

## 12. WET

Riding along  
Living the underground  
Staying to cry  
Burrowing undertow  
Musicianship  
Is nothing to fall away  
Flight and signs  
Compete for the end of day

The last are divine  
Coloring saves  
An innocent crime  
Fortunate names  
A master in time  
For rock scissor plays

Senses belong, innocent roles we play  
Bastards are gone, taking to sound away  
Playing the game, taking a turn in stride  
Finish your meat, finish your roll it's mine

The last are divine  
Coloring saves  
An innocent crime  
Fortunate names  
A master in time  
For rock scissor plays

A crushing defeat is never a goal aspired  
Rounding the board is missing a chance to lose  
Gravity spins in particles lost in time  
Gravity reeks of liars' deceptive eyes
