

ISOTOPES FROM HELL

1. BALLYHOO

Feel no void, peace of men
Fall into traps of them
Holding down, hope into
Rise above falling down
Feast of grace, calling to
Moments rise fall into
Calling daze, wandering to
Peace of night falling down

Diseases of loving is nothing but everyone hates
Diseases of loving is nothing but everyone leaving now

Rolling ground, broke in two
Feel no love follow you
Panic state, reason clear
Distant stare place of fear
Memory serves, in the night
Flatline plate oversight
Bastard son, from the ring
Rise above angels sing

Diseases of loving is nothing but everyone hates
Diseases of loving is nothing but everyone leaving now

Best to stay, for the fight
Demons play in their beds
Walk that line, walk that way
Angels pass on from that day
Super sight, from the dawn
Clouds appear heavy song
Master calls, loading in
Peace of night falling down

Diseases of loving is nothing but everyone hates
Diseases of loving is nothing but everyone leaving now

2. CATTYWAMPUS

Huevos, it's calling down to me
Rolling down another mirror
Huevos, it's never hard to see
Feeling there's another menace
Huevos, it beams another view
Spinning out another tale
Huevos, she taught me not to see
Thoughts that never are amazing
Huevos, they're falling out of me
Flowing out of bulging veins
Huevos, go shrinking out of size
Tumbling on the ground in anger

The summers come with neighbors
Stacked upon them evil flowers
You will find another canvas
Painting with a brush of mangled
Man without a sullen mystery
Hiding with another fist there
Regiments were once a symbol
Of the strength a man at arms be
Fighting with a cloak and dagger
Set upon a sunny hilltop
You then paint another picture
Of this man a tethered cuckold

Huevos, it's calling down to me
Writhing on the quesey ground
Huevos, it's never hard to see
Buried in the sticky mud
Huevos, it beams another view
Looking for an empty ending
Huevos, she taught me not to see
Signs of other desperate acts
Huevos, they're falling out of me
Landing in a scattered pile
Huevos, go shrinking out of size
Rising up into the stomach

3. FARRAGO

You find yourself a nomad and hide
The walls are wrong
You find yourself the middle of a sign
I'll have you know
You see the logic there it's nothing fine
I haven't had to stay
I sleep with all the wallows of the blind
In heavy stares

Kiss is a right on violate

You seem to be in mind of a race
Into the sun
You'll burn up in a scattered little place
And melt to one
Temptations of another heated lie
Will fall in line
To satiate the borders of a time
Without it's blood

Kiss is a right on violate

4. GALLIMAUFRY

Can apply I'll make it
Shivering I can't do
Misery I can't do
I see it, I see it
Hold it down with space now
Like a rifle Lego
Hold it at an angle
I see it, I see it
Wait until an April
Close it with a staple
You will then enable
I see it, I see it

Taken from the single
Military madness
Strategy of empty
You use it, you use it
Distance is a weapon
Arsenal of difference
Use it on your lovers
Abuse it, abuse it
Festered with a compound
Apothecary madness
Shameful when you're laughing
You like it, you like it

5. HOKUM

Realize you satellite
Going down a shining light
How I know the growing pains will follow me
I never liked the finest wine
I never liked a bitter time
I never sought the darkness of the world like you
Stay the course you'll lose your way
Waking up a different day
Saving all your woes for me and you
I never liked your twisted fate
Upon the world you subjugate
You're leaving all your misery to me

Oh shining in the sea

Crystallize the passive air
Instincts on the rambling dare
Nothing seems to move you past your patience
Calling from a sacred cow
I asked you if you'd seen enough
Hemorrhage is a word that you don't favor
Monochrome is all we see
Colors gone it had to be
Nothing ever lasts with you but anger
Sorrow sets a steely grin
Summer's end and summer's been
Raise another toast to lovers losing

6. INTERROBANG

Worry bout my jellyfish my jellyfish
It falls apart like cotton
You must see the Lucifer the Lucifer
He comes upon the lovers
Fire upon a flying bee, another night
I'm crying like a baby
Humans always falling down falling down
With sympathy I'm calling
Pulling out where no one needs a single thing
A ministry of angels
Love is not a simple rhyme a jealous rhyme
A random act of violence

Why in a sound of all the reasoned
Why in sound of a lonely I'm leaving

Find a knowledge of our dreams
Find a knowledge in our dreams
Find a knowledge of our dreams

Worry not my Saturn fish my Saturn fish
I'm falling down I hold out
You must see the roses there, the colors there
The calling down I'm holding
Find out every hole in me a hole in me
Haven't I I'm holding
Empty walls are coming down are coming down
To realize their patience
Woolly mammoths follow me in dreams I see
In dreams of every color
Then you like to follow me to follow me
And run away I'm standing

Why in a sound of all the reasoned
Why in sound of a lonely I'm leaving

Find a knowledge of our dreams
Find a knowledge in our dreams
Find a knowledge of our dreams

7. KERFUFFLE

Why don't you appear as always over me
Shameless always shame is all I want to be
Final wait into the darkness of a fall
Seize a moment in the rest of history

Hold out, hold out I wonder if it's real
Cold out, cold out the weather isn't real

Realize that love is decent
Realize we have indecent
Real life we fall in deeper
Realign into the recent
Golden night a sullen reason
Coming to a call of anger
Realize the night of passion
Calling from a tree of reason

Why don't you express your favor into me
Liberty is nothing without honesty
Shaving time from other's wills is overdue
Making sense of any love is hard to do

Hold out, hold out I wonder if it's real
Cold out, cold out the weather isn't real

Realize that love is decent
Realize we have indecent
Real life we fall in deeper
Realign into the recent
Golden night a sullen reason
Coming to a call of anger
Realize the night of passion
Calling from a tree of reason

8. LOUCHE

Going to town I'm going down deeper
Shake it big I'm going down deeper deeper
Hear my sound I'm going down deeper
Keep me around I'm going down deeper deeper

I send another vile to you in this way
You love it when I choke you in this crazy way
The screams of bliss are rising when I come this way
A mask of interruption teases you today

Going to cut you I'm bleeding much deeper
Tie your arms down I'm going down deeper deeper
Hear your cries I'm going down deeper
Feel your thighs shake I'm going down deeper deeper

I come to lie to you in ways you've never known
You don't believe a word but that's what makes it wrong
The needs of lust are changing nightly in a storm
You always want what you don't want it if it's gone

9. MALARKEY

Strangers calling names
I want to believe in your comedy
Stranger's gorey games
I want to accept your apology
Strangers violate
I want you to stop here and bother me
Strangers go insane
The beast with his hemlock is coming soon

I believe that every mortal man can see it there
I contest the rival wings of harpies in the air
Culpability is something that I do accept
And transgressions of a fallen man have met the test

Strangers playing tunes
I hear them inside of an empty shell
Strangers followed me
They wandered from points of a distant land
Strangers talk to him
His life wasn't right from the start of it
Strangers enter in
The meaning is tethered in anarchy

I believe that every mortal man can see it there
I contest the rival wings of harpies in the air
Culpability is something that I do accept
And transgressions of a fallen man have met the test

10. POLTROON

Instrumental

11. SKEDADDLE

Ray of light you follow another condition
Ray of light you follow another conviction

Signal the end I can't even see it
The darkness has come you don't even mean it
Trusted your love I can't even see it leaving

What is gone I cannot imagine
Take your thorns and leave me the roses
Find your stakes a balance of nuance to pleasure

Dirty games have entered your playbook
Stay the same was never intention
It remains the grind of contention, save us

Do not leave two lovers unfinished
Cries of hope from someone diminished
Cries of life from someone who's asking for favors

Ray of light you follow another condition
Ray of light you follow another conviction

12. TERMAGANT

With the sound of messages calling down
With the reason for

Get away all you sinners
Get you wallow while you wait
Get away all you sinners
Get you wallow while you wait
Share a light all you winners
You might call it quits
Get away all you sinners
Get away all your pain

With the sound of messages calling down
With the reason for

Get away all you sinners
Get you wallow while you wait
Get away all you sinners
Get you wallow while you wait
Share a light all you winners
You might call it quits
Get away all you sinners
Get away all your pain

With the sound of messages calling down
With the reason for

13. WIDDERSHINS

Taking all the wisdom
Turn it right around and set it free
Shaking all the numbers
Throw them back together in a theory
Reservation nation
All that we expect our home to be
Never see another
Never see another stolen love

Beautiful erosion
Taking all the sediment to sea
Stifle all the evenings
Watching all the stars collect in veins
Shadows in the footsteps
Shadows in the morning calling me
Holding on to ribbons
Highways leading nowhere from this place

Shutting eyes not restful
Islands in a moment have survived
Gripping all your shoulders
Turning round the dry in the rain
Devastating anger
Devastating hold over me
Then I see you leaving
Then I see you coming back to me
