

## QUIET IS CHAOS

### 1. BUMPERS

It's not the same as night and everyone's here  
The walls come crashing down, I'm outta here  
You say that nothing's wrong, that nothing is  
You say there's something gone, there's nothing here  
I wouldn't have this old feeling, this reason to fear

You spend your blowing now a hollow wind  
Falling outside of me you fall again  
Calling me out when I need sympathy  
Rolling around a world I've always seen  
You called an ambulance and never waited there for me to be

Going away is nothing I haven't seen  
You say you'll stay but then you're never there  
A criss cross memory will never be  
Into the lowest form of agony  
Not to fall on down to earth again you're resolute in fear

## 2. CRIMINITLY

Face of clouds will die going down to me  
Shameful and remind my going down to me  
Visit all the answers by day in there  
Fortunes are the acid I feel it there

Fate will never lie in a spring of hate  
Blowing with the force of another day  
Steps of grainy haze be a further time  
Sense a different feeling sense a different mind

### 3. CURUTHERS WAS NASTY

Curuthers was nasty a simpleton's method of cruel was gain  
The following boys were intent upon teasing their ugly game  
The locker room antics had turned their own mischief to tortured rage  
A victim is nothing but fodder for boys who would bully with their brains

A woman is simple when she holds a razor up to your neck  
She feeds on the fearful she feeds on the desperate in love that way  
To demonstrate power a man must not cower for those to see  
The force of a blow is as easy as tripping the soul of me

#### 4. GONE

Shake it down I'm falling down with pain  
Evil woman coming round again  
Take a rest there's something wrong in here  
All the signs point to you're gone my dear

I wanted to keep our perfect heaven  
I wanted to feel that effervescence  
She's shaking my dreams with darker visions  
Although we don't have another presence

I don't see a thing come down to me  
Foreign eyes grow cold and lose their heat  
Wordless lies engulf the matter plain  
There you go you've left me once again

## 5. I STEPPED IN IT

Dribble along with the message of liars and  
Substitute truth for the rest of your life as it rolls away  
Damage control is not everyone's business  
To kneel among feathers and far isn't hipness and acetone  
Flavors of unction internal combustion  
The engines of reason have never been more like an attitude  
Marshall your anger before you've considered  
The matter at hand is just what you had figured it out to be

Everyone's stopping to look at you choking  
Upon the big piece of an interlope hoping to find a screw  
Interest will waffle upon a temptation  
The Philistines cower as all the new nations invade their land  
Mercy is sacred but you don't approach it  
As something inside us that makes it all naked as anything  
That's where I left it and that's why you see it  
A grand revelation is nothing but attitude intuit

## 6. IMAGES DEFINING BEHAVIOR PATTERNS

See your face calling to  
Desperate manners fall in reservoir  
Can I take all in mind  
Bend the righteous angled fine  
Measure it just like you  
Realize you call an animal  
Keep that hope, falling scene  
Holding down that wretched dream of mine

Find a cyst on human tooth  
Tongues are wandering with the truth  
Hold it deeper, hold it fine  
Pull that shrapnel it is mine  
Indecisions, angel's brew  
My behavior bothers you

Reservations calling time  
See the shadows overhead of us  
Martyrs hang on every word  
Lust of creatures fail too miserable  
Reach around and give me pain  
Solace won a sticky gain  
Don't you look at what I see  
Can you see they're after me

Find a cyst on human tooth  
Tongues are wandering with the truth  
Hold it deeper, hold it fine  
Pull that shrapnel it is mine  
Indecisions, angel's brew  
My behavior bothers you

## 7. JUMPING LEGS CONTINUED

Die that way in seventeen days  
Crawling house, Apollo haze  
Sever this, dying flies  
Seminal fruits of hanging lies  
Balls of pain you haven't seen  
Tortured ways never has been  
Fall into that black abyss  
Then bite down a bloody kiss

Rip those nails, grin so wide  
Jack my face, shave my eyes  
Crawling out worms, crawling out there  
Hear my tales, lies don't care  
Rend those ways you see wrong  
Bend your neck, it's too long  
Kneel down, falling yet  
No more earth, that's what you get

## 8. NEW LESSON LEARNED

Grace you seek calling on religion  
It's not me calling on time  
I should be calling on the system  
Shameless be calling on time

Lesson learned by following my dreams  
Voices telling me to go it seems  
Cold is ever blowing in my head  
Leaving here was good for us you said

Lips are lost and fallen in a corner  
What you say is lost and gone forever  
Walk down another city main street  
Let it be by falling in a corner  
Two days I haven't seen a sunrise  
Just watch the words upon a data page

Braced it seems falling on a misery  
Lost you there stuck inside a page  
I could be missing the election  
Tapestries hanging in the air

Lesson learned by following my dreams  
Voices telling me to go it seems

Lips are lost and fallen in a corner  
What you say is lost and gone forever  
Walk down another city main street  
Let it be by falling in a corner  
Two days I haven't seen a sunrise  
Just watch the words upon a data page

## 9. PARTING OF THE WAVES

I cried enough it's all just innocence  
I cried a thousand different ways  
I see it all as common justice now  
I see them all as golden days  
Moving on I'm calm in spite of it  
A wooly coat and kind of dazed  
Shout the shout of rising reticence  
Shout the shout of parting waves

Brave the land of fallen innocence  
Shout the shout of parting waves

My own mind I'm all in pieces  
Sinner me I'm all in pain  
My own mind I'm all impeded  
Sinner me I'm falling rain  
Hold me close just one more time dear  
Hold me tight and don't let go  
Can I feel that special feeling  
Can we love that way again

## 10. PROOFING

Praise the sons of Armageddon  
Arms of steel and gates of heaven  
Flash of night and howl of winter  
Bestial rites are nail splinter  
Rising rising from the ashes  
Men of stabbing bloody gashes  
Just like 1937

Rocks have crashed into an infant  
Can't escape the bleeding distance  
Hatred seeps from every mantra  
Messages of heavy water  
Slamming into fiery battle  
You can hear the heavy metal  
Screaming from the quiet chaos

## 11. REFRESH UNDERNEATH GARGOYLES

Slave's incisions slipped on by his hand  
Gracious warm delicious is their brand  
Reached the point where preaching was his game  
Christ your Lord will fall in just the same  
That just his grace will send you something new  
Find out now there's nothing you can do

This is real fine dining  
With the blood of taste  
This is real fine dining  
It's a watery grave  
Money runs through fingers  
With divisions of tithes  
Give it all to churches  
So you don't have to die

Symbols eating time  
Go a vision  
Symbols eating time  
Coalition

## 12. STACKED AGAINST

Well a sinner doesn't cry when he faces euthanasia  
He'll never see another night, he'll never need a wakeup  
They captured everyone insane and everyone is nothing  
It's kept everyone at bay and there's nothing in his mouth  
And there's nothing in his veins  
And there's no one in his rolodex

There's something wrong with me today  
There's something wrong in every way  
There's something wrong with every nuance  
There's something wrong with every angel

Come to rise  
Save the surprise  
I know in my heart  
It will keep us apart

It's another fallow day and you're calling all your gay friends  
A colors of Crayola day and they're telling you to leave me  
When you talk to me that way I can feel it in my entrails  
It's another fallen way stacked against an aging minstrel  
Stacked against an aging man  
Stacked against me by my friends

There's something wrong with me today  
There's something wrong in every way  
There's something wrong with every nuance  
There's something wrong with every angel

Come to rise  
Save the surprise  
I know in my heart  
It will keep us apart

### 13. THE YELLING DISEASE

You find those times  
That set me free  
Make those decisions  
Easy for me to blow out

You called it dibs  
I said that's wrong  
That's all you give  
Nothing for me to hold on

This is the righteous falling  
This is the enemy and

This is a race  
This is a rout  
The compass points  
To bad behavior from me

Fall in disease  
There is no right  
It's not the same  
When you antagonize me

This is the righteous falling  
This is the enemy and

#### 14. TIMID LESSON

Shake another old window misery  
Going on the old hollow me  
Shake another old window misery  
Going on the old hollow tree

Changes come with the weather daily  
Keep it on with the sun so deep  
Changes come when the silent wind blows  
Death will not come in sleep

Feel a sense  
Whores in heat  
There's a sense  
Whores in heat  
Fears around  
Whores on heat  
Here's a sense  
Of whores in heat

Has the time begun where I'm misery  
Ancient times begin when we'll be  
Satisfied with no memory  
Satisfied that we're free

## 15. UNDO REDO

Jesus Christ was a whole in a hole and ahead of us  
Lost and die and die and die ahead of us  
Racked up on the cross and bleeding ahead of us  
Crying out to God above a hole in us

Who are other saints that feel  
How many men were saints that were real

This man died in a hot sun fried and ahead of us  
You can see all good men die and ahead of us  
Shake it down from a hole in time and realize  
This man wrong and the feelings gone and realize

Who are other saints that feel  
How many men were saints that were real

Take another reason in a river as a part of it  
Reeling down the current and believe that it is part of us  
Rocks and stones are being thrown in front of us  
Never satisfied that he had to save the rest of us

Who are other saints that feel  
How many men were saints that were real

Jesus Christ was a whole in a hole and ahead of us  
Lost and die and die and die ahead of us  
Racked up on the cross and bleeding ahead of us  
Crying out to God above a hole in us
