

# WHEELS

## 1. MOTION

Cradle of symbols  
Having this kind  
Dreaming is simple  
We're high all the time

Oh it's changing, Oh it's changing  
Oh it's changing the times

Words are the symbols  
Have you no shame  
See all the symbols  
Yet nothing is real

Oh it's changing, Oh it's changing  
Oh it's changing the times

Men die for symbols  
There is no change  
Flying your banners  
Death is the same

Oh it's changing, Oh it's changing  
Oh it's changing the times

## 2. AXLE

Balanced world as balanced go  
We celebrate the leaders who show kindness  
We see them come and see them go  
They're rare to find and even rarer to stay with us  
Bullets take them to the wind  
Despots overthrow them in their weakness  
Strength of matters in the world  
From a life beyond they come to haunt us

It seems we've fallen down to  
(Feel like rolling on)

Right now we're lowered down to baser instincts  
We let the criminals and despots rule us  
Exchanging rights for profits is their business  
Cheapen your worth as human beings

Precious time to live your lives  
Never asking more than simple patience  
Celebrate the lives of those who sacrificed for freedoms of the people

They're coming now to grab your soul forever  
Wretched anger fields the armies bludgeon  
Grab for land and grab for power over  
This has ever and will always truth be

### 3. SPOKES

With a grease upon the fire  
It calls upon the dead  
And raining all the patriotic slogans on your head  
Cold as all the winters  
And the soldiers all the same  
Sounds of propaganda from the radios of hate  
Isn't it the same as purges  
Isn't it a dream  
Crawling down the alleys and it's washing down the drain  
Everyone's in prison  
Yet everyone is free  
Kings and priests and governments are working towards the end

I find a lane  
I find a listen

Find a stable government  
In the land of Greeks  
All the men agree on one thing, all agree on keeping peace  
What this means is keep dissention  
Creeping in the bowels  
Keep the voices in a silence covered up in fear  
With their lips up to the chalice  
With the semen covered dead  
An institution made of malice filled with talking heads  
The resurrection of the masses  
Gathered like a storm  
Overthrow the tattered tassels, keep those bodies warm

I find a lane  
I find a listen

#### 4. SPIN

Cheaped as you might not follow storms  
You find a symmetry  
Guest of honor finds inside a storm  
You see a mystery  
Guns along a wall of fractured saints  
You hear the damages  
Find a lonely soul without a name  
He turns to chemistry

You find Nepal  
You find Sikkim

Find a will and the cold is falling  
Shame of the fallen the call isn't coming

## 5. ROUND

How long the mastery  
Cage is set proprietary  
Holding down in misery  
Hold us down supremacy

Holding down and lie upon  
Foot on neck your lies abound  
See us there as supplicants  
We are timid to obey you

## 6. CIRCLES

Dig deep violate a nation  
Bold steps to eradicate the nation  
Take our rights and hold them with you  
Despite the irrelevance of issue  
I hear the noise of lies and rhetoric  
I hear the sound of coming tyrants  
More men are claiming revolution  
They say that I am just a communist

We want more equal distribution  
Our voice a social revolution  
Deploy a policy of silence  
The voices of a new alliance  
This change is something to be feared now  
Rise up against the old oppression  
En masse a culture of aggression  
Has split a people of sensation

Whisper said  
Cha ching  
Going down  
So long

## 7. RADIUS

Feel it violate the single razors of a solitary beast  
If it causes changes in the martyrs as they walk into the beast  
Rolling rolling down the highways of the mysteries  
See them all around, I see the tanks and bombs and anger of the beasts

Circling the wagons

Count them there in a horrid game  
(The reason necessary)

Signaling the armies to the circle of protection for the beast  
View the tensile vomit of a despot in deliverance of his speech  
Stomping on the children as they march along in boots upon the streets  
Walk upon the bodies of the innocents on fire with holy rage

Circling the wagons

## 8. ROLL

Feast of fire, cannonball dance  
To the ground, in subservient stance  
On your knees to masters of the weapons  
In the hands of desperate heathens  
Who pretend to be your gentle fathers

Find your strength, numbers don't lie  
Overthrow with a funeral pyre  
Taking all the arms away and  
Leaving with a naked ember  
Satisfy your sacred anger  
With an overthrow of danger

Ages of men wanting to rule  
Take them down, they all will fall  
Never ending line of despots  
Falling as their palace crumbles  
More will rise to take their places  
More to topple through the ages

## 9. TRAVELLING

Realize that nothing isn't nothing isn't  
Nothing isn't there  
Ceilings on the walls upon the windows  
And the gates aren't really there  
Blasting glasses shine above it all  
They shine but nothing isn't real  
Symbols of a massive infiltration  
Isn't coming from the crowd

In the sea

Can I see another rain  
Can I feel another rain  
Can I feel another pain

Oh in the viaduct  
In the viaduct  
In the viaduct

## 10. SPIRAL

Then a man came up to see me  
He swallowed, a life force  
He swallowed, in anger at being

And a man comes up so hollow  
He's broken, he's passive  
He's taken the future unseen

And a man walks by me fearful  
He's trembling and shaking  
Ignoring the real enemy

Simple last time economy  
{We are the chosen ones}

If a man risks all his living  
With torture and hiding  
And falling, and never to see

When a man comes here for solace  
I'm silent with pleasure  
With deference, with kindness unseen

If a man comes for protection  
I'm silent, I'm passive  
I'm hollow, I'm never to see

Simple last time economy  
{We are the chosen ones}

## 11. WHIRLS

Rolling down  
Rolling pain  
Swollen lips  
Swollen men  
And a hound dog  
And a simple event

Feast of men  
In a cage  
See them trapped  
In a rage  
And a hanging  
Is a single event

Violation of men  
Violation of rage  
Violation of fate  
Violation in death  
Violation okay  
Violation of a man

I can't exist, I cannot see  
Going down in violation  
Is it deep greedy days  
Cannot see the violation  
Greeting dark dusty days  
We cannot see the violation greed

As they feel  
Crawling pain  
Swollen lips  
Swollen men  
And a gesture  
Of shackles interred

Swollen wrists  
Swollen pride  
In these mists  
They will hide  
A figure  
In darkness abides

Violation of men  
Violation of rage  
Violation of fate  
Violation in death  
Violation okay  
Violation of a man

## 12. GYRO

Creepy times  
All types are knowing  
Creepy times  
Our wind is blowing  
I don't know what the message is that you bring  
I don't know if the winters turn into spring  
Creepy times  
Folding into policy

Desperate times  
Feeling like stones  
Undermined  
Throwing us bones  
I don't know if your strength will turn into waste  
I don't know if your power's the source of your fear  
Creepy times  
You watch your back

### 13. MANDALA

The rest of men are falling out of free  
And delivers them to mouths who want to feed  
When I see it come I run right back to view  
And I lie awake in politics with you

Hold it down we're saved  
Pull them down today

Go upon the sun a happening  
(I understand)  
(Go inside it)

Well the bosses of the world are breaking bread  
And the conversation changes to the dead  
The bodies of the children are unseen  
And the conscience of the people stays unclean

Hold it down we're saved  
Pull them down today

Go upon the sun a happening  
(I understand)  
(Go inside it)

#### 14. DERVISH

Change of innocence  
You find nothing there  
I feel a plan come down  
I feel a dervish stare  
Rosin on the hand  
Rise upon a stare  
Reason innocence  
Smokey atmosphere

We have unknown  
All we have it known

A finer supplicant  
I find them all to stare  
I find them in a room  
I find it's never there  
Cold and heavenly  
Inside isn't free  
Nothing home to be  
It hasn't all of me

We have unknown  
All we have it known

Realize we haven't nation fallen out of ease  
Realize that our whole nation fallen on disease  
Realize we have a nation calling down to fear  
Realize that our whole nation doesn't want to hear
