

## XINE

### 1. CRANK

Well I greet the crank and I violate all that is gracious  
In a sea of volatile a mind of anyone ancient  
Magical mysteries of teeth among men almost missing  
See in a while we will see in a while an omission

Well I'm planting the crop of a powder in white knives in ancient  
The sinister rising of decadence into a station  
Haven't you seen enough sparkles in eyes become wretched  
Haven't you heard enough terrible lies among distance

## 2. DUSK

Hold 'em down and beat 'em up politzen  
Oh and now I cannot feel another reason  
To feel the light of rupture in collusion  
The light shields expects to have no reason

Hold little men explore the wars in peacetime  
Crying out for something more to do  
Images of protest cause their hair to fly  
Soldiers trained to find something to prove

Dastardly the infants climb on ladders  
Hob nailed boots and chain mail are the glue  
Culture of a restless destitution  
Calipers of memories killing Jews

Hello  
War

Activate the banks of frightened soldiers  
Demonstrate the power of our fuel  
Molotov happy with our senses  
Symmetry is acting on the cruel

Hello  
War

### 3. FORCE

Following in mesmerizing  
Pattern of a day that goes by slowly  
And I see a darkness coming in to me  
Is it not a reaching for a giant  
A beginning of a sunshine  
In another minute I will see the  
Valkyries screaming at the doorstep of the sunshine  
Memories of the ancient wonders  
Stopping all the clusters of the  
Timid ones who cannot face the sunshine

Take a rest my fellow traveler  
Taken from a list of nothing  
Messages from up above are hanging  
Rising from the ashes of the fearsome

#### 4. FORK

Little wisdom of age  
Becomes so long in the rain  
To travel down the two roads  
And take the first one you see

Oh, you are down

Shock man's hands  
Fire is mine to wane  
Be white in time  
Piss right with pain  
You see the sunshine  
You see the blame  
Of calling down  
Calling rain

A little wiser they come  
The washing up from the ground  
A choice is then to be made  
Of two opposing like sounds

Oh, you are down

## 5. ISOTOPES

Neither one makes me breakdown by myself  
Feeling rain in a semblance of myself  
Catch a fall if a tumbling does occur  
Ego world really isn't all to be

Simple strings really crazy bout myself  
Rearrange different isotopes of breath  
Rearrange, you don't see it everywhere  
See the strange, you don't even really care

## 6. MAZE

Creep on down with fight too well two hands  
Sit won't you get heavy falling down  
Beast of burden if you love him hands  
Follow in your mind in balling want  
Take another reason with his hands  
Feel it coming down in rolling tongues

Shake a lonely rolling beast  
Shake along this time in beast  
Shake along in wailing lover gone

Can you will a world you want in years in beast  
You get down a world and it will lose to peace  
Shake my gait and falling down the wind of peace  
You will want to find another winter peace

## 7. OFFAL

Get it, a black cold heart  
Get it, a lie to bold to be  
Get it, a white cold heart  
Get it, a white to cold to be

Get it, a white cold heart  
Get it, a white too cold to be  
Get a new white cold heart  
Get a new white too cold to be

You've got a changing grovel  
You've got a changing world  
To soul this living hovel  
To soul a world of pearl  
You've got a changing grovel  
You've got a changing world  
To soul this living hovel  
To soul a world of pearl

Get it, a black cold heart  
Get it, a lie to bold to be  
Get it, a white cold heart  
Get it, a white to cold to be

Get it, a white cold heart  
Get it, a white too cold to be  
Get a new white cold heart  
Get a new white too cold to be

You've got a changing grovel  
You've got a changing world  
To soul this living hovel  
To soul a world of pearl  
You've got a changing grovel  
You've got a changing world  
To soul this living hovel  
To soul a world of pearl

## 8. RAIZE

Guest, you follow  
Reach your side  
Oh, be careful  
Cattle abide  
Reawaken  
Mind you save  
Have another  
Raize today

Pump the bellows  
Fill with air  
Catch a spider  
From the sill  
All into it  
Be a slave  
Guest, you follow  
Don't behave

Bring the chalice  
To your lips  
Hurl the darkness  
From the air  
Plow a furrow  
In your brain  
No destruction  
To intervene

## 9. RECTORY

There's a toad's head  
And a mystery man  
Where lonely razor finds a line  
In a burned tree  
Where a songbird roams  
And a lovely woman finding hope

You see me  
Planted here  
With a light alone and kerosene  
You might be  
Reminding me  
With a moments sorrow changing be

Then a live corpse  
Benign to be  
And it falls among the linden leaves  
For it goes there  
In a silent way  
And the sound of want is every day

Is a cold day  
Is a cold way  
And a fortune's notice along the road  
That we left behind  
In a deeper haze  
In a different space we cannot find

We cannot find  
We cannot find  
We cannot find  
We cannot find

## 10. SPEARS

Realize the heavy eyes I haven't time  
See the wisdom of the rich, I don't mind  
Following and taken from any rhyme  
Shaking up and shaking out all the time

Don't say, go here  
Don't know, don't fear  
Don't say, go here  
Don't know, don't fear the time

Brutal lies the heavy witch of anyway  
Total recall in a smile of better days  
Take a shot of nothing better formed from clay  
Molded from that inner sanctum anyway

Don't say, go here  
Don't know, don't fear  
Don't say, go here  
Don't know, don't fear the time

## 11. VERBATIM

Find yourself in times of mystery  
Follow faces in the clouds of grimace  
Take a road less traveled  
Up into the sky and feel the fingers probing  
Angels fear to tread  
In pairs of actionary minds is nothing pretty  
Don't despair for beings  
Bringing gifts of climax up into my horse hair

Break my back and break my will  
As riders come and see my angry whisper  
Leaves of grass brush by my face  
And fall into a maze of distant amber  
Colleges of students rising  
Into blackness turned to heinous demons  
Force of words upon the pages  
Nothing comes of giving rage a meaning
